ARTISAN OF SOUND

There is an unspoken understanding between humanity and nature.
During our lives, we often experience moments where our connection
with the natural world may waver when faced
with the vastness and intensity of our surroundings.
Nature expresses herself through shapes, light, sounds.
Nature is the home we must enhance.
Humanity finds connection in music, sharing what we've discovered
during our time spent in the world of Natural Sound.

DISCOVER NATURAL SOUND

Omnia is an ecosystem that embodies Sonus faber's values and heritage, from Italian tradition to modern technologies. An organic architecture of technological desires, exemplified in one, wireless system. Our journey is inspired from connection, the truest relationship of humankind - the link to life.
With Omnia, Sonus faber adds to its collection a contemporary and powerful all-in-one active system. The system embraces innovative acoustic technologies with wood elements customary of Sonus faber, fitting seamlessly within any home environment. In today's fast-moving world, Sonus faber's Natural Sound enhances life at home with loved ones.

FEEL THE VIBES

SENSO™

SENSO™ is Omnia's tactile illuminated wooden top panel. This touch sensitive interface allows direct control of the system, with an additional remote operation available via the supplied handheld controller and user's smartphone or tablet. The illuminated lines indicate Omnia's mode, which streaming service is in use and which input is selected, also allowing the user to adjust the volume.

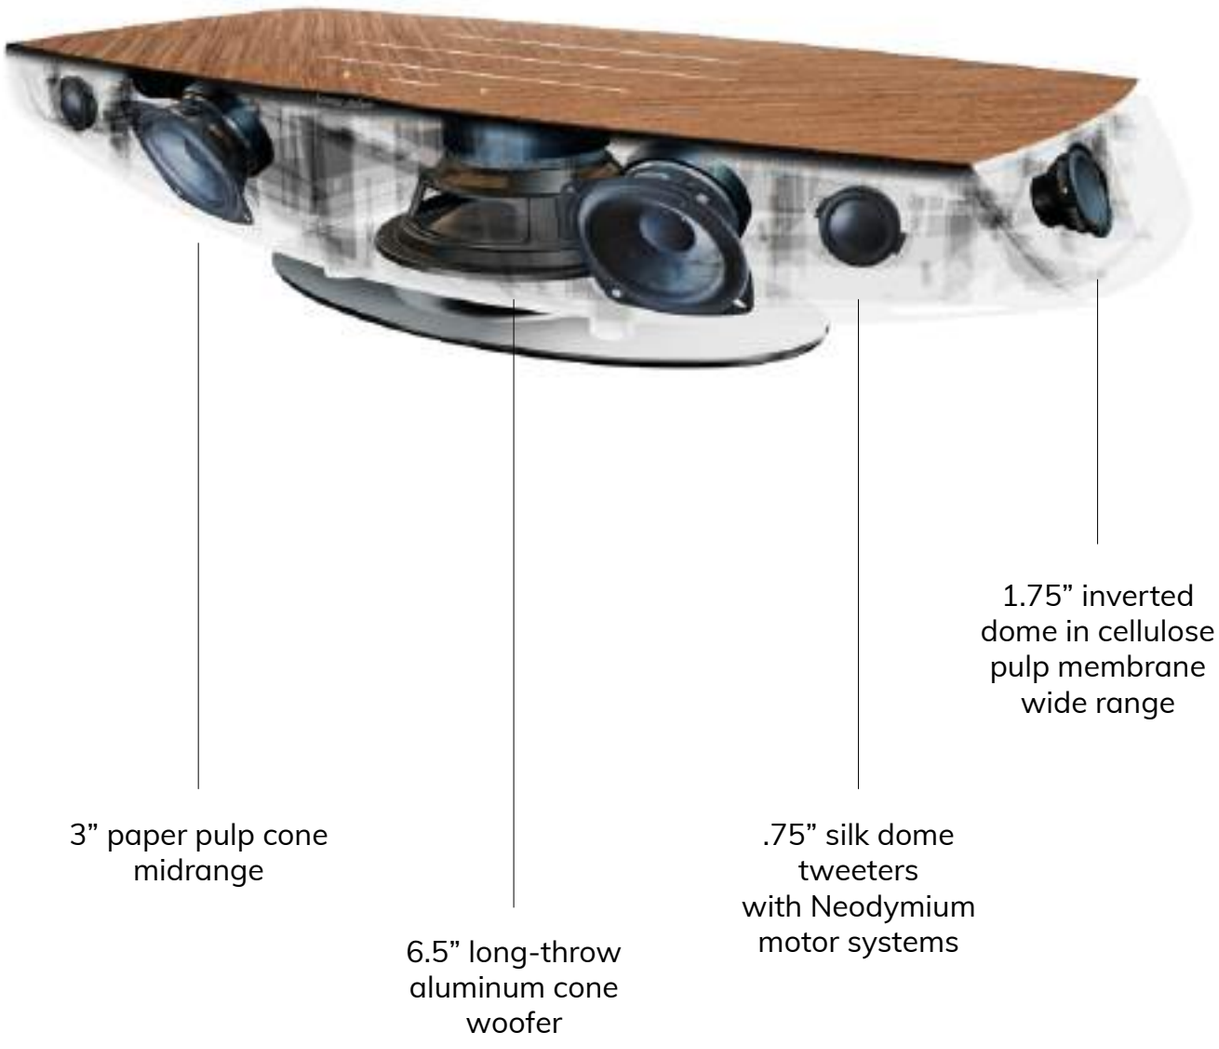
SENSO™



Acoustic package

The Omnia acoustic package features a 4-way closed box system with 7 drivers driven by a **490 watt** amplifier.

On the front, two .75” **silk dome tweeters** with Neodymium motor systems and two 3” **paper pulp cone midrange** drivers guarantee the Sonus faber sound signature and deliver life-like micro-dynamics.

Low frequency is achieved through a 6.5” long-throw **aluminum cone woofer** in a down-firing configuration, creating an immersive and impactful sound field.

On both sides of the system, two 1.75” wide range inverted dome **cellulose pulp membrane** drivers with **Neodymium motor system**, enhance the sound field with a greater sense of dimensionality in conjunction with newly trademarked technology Omnia is bringing to life: **CRESCENDO™**.

This new technology combines a mix of in-phase bipole and anti-phase dipole sound schemes to redefine the **3D listening experience**. Listeners will discover an endless new world in this 27” package.

The Natural Sound

ENCHANT YOUR SOUL

CRESCENDO ™

Omnia delivers stunning performance: 490 Watts of power driving 7 speakers optimized by Sonus faber, featuring a specially designed new acoustic technology called **CRESCENDO™**. This advanced signal processing system results in a greater sense of dimensionality and immersivity, cleverly utilizing the two full range sides speakers. It creates a crisp wavefront which, through room reflections, mimics that of a live performance. A natural experience just within your room. Omnia can be optimized to perform in any environment, thanks to the Room Placement options and EQ modes selectable on the web-based set up page.

ENCHANT YOUR SOUL

CRESCENDO™

Connections

Omnia’s wide connection options guarantee seamless playback from mobile devices thanks to **Bluetooth, Apple AirPlay 2** and **Chromecast** built-in.
Of course, WiFi Certified system ensures interoperability and security to users’ connections.
