CARE INSTRUCTIONS

- Clean with a soft cloth, damp with diluted soap water solution if necessary. Do not use chemical cleaners
- If the device comes in contact with liquids, quickly wipe away. If submersed in water, do not turn the device on until completely dried. Note: liquid submersion voids the warranty.

WARRANTY

MEE audio products purchased from authorized resellers are covered by a 1-year manufacturer warranty (2 years in the EU).

WARNING - IMPORTANT SAFETY INSTRUCTIONS

This product may pose a strangulation hazard and should not be used by children, the elderly, or anyone at risk of becoming entangled in the cord.

Listening to audio at high volumes for extended periods can cause permanent hearing damage. To protect your hearing, always keep the volume at a moderate or low level. When connecting your earphones, start with the volume turned all the way down, then slowly increase it to a comfortable level.

Do not use earphones while driving, cycling, operating machinery, or during any activity that requires full awareness of your surroundings. The passive noise isolation may block important sounds like traffic, alarms, or warning signals, potentially putting you or others at risk. Use only in safe environments where reduced hearing will not compromise safety.

Note that alarm sounds may sound different when wearing earphones.

Do not use earphones if you have an ear infection. Consult your physician prior to use if you have an ear infection or any drainage from your ear(s).

Sudden or rapid removal of sealed in-ear headphones may cause damage to the eardrum. Do not remove from the ear by pulling the connecting cord. Instead, remove slowly using a twisting motion to gradually break the seal.

CAUTION: Choking hazard. Keep the device and packaging out of reach of children and pets.
