

Solstice Special Edition Turntable

Solstice Special Edition is the first turntable in Naim Audio's almost 50-year history. Lovers of the organic authenticity of vinyl can now enjoy it with the musical purity and passion only a Naim system can deliver. Limited to just 500 units, this Special Edition includes the Solstice turntable, a next-generation version of the iconic Naim Aro tonearm, an Equinox MC cartridge, Solstice Series Phono Stage, Power Supply and bespoke accessories set.

The Solstice turntable combines core Naim design philosophies, such as multiple levels of mechanical decoupling, with a celebration of beautiful materials. It features a magnetic bearing supporting a high-mass, highly polished aluminium platter, with a unique, self-calibrating motor drive system, meticulously delivering the Naim sound.

The turntable plinth consists of 47 wood layers skinned with metal to create an extremely low-resonance structure. The plinth features an island between the platter bearing and arm to keep these components critically aligned one to the other.

A three-arm decoupling system isolates this island from the plinth, blocking any vibration caused by airborne sound or residual motor vibration.

The turntable comes with a Solstice Accessories Set – including Digital Stylus Gauge; Bubble Level; Hex Drivers (x3); Vinyl Adjustment Tool; Dust Protector and Cleaning Cloth. The Special Edition package also includes a commemorative book, plus the Naim Records True Stereo album – a curated collection of superb-quality True Stereo recordings, newly remastered for vinyl.

Solstice Special Edition Turntable

Parameter	Solstice Turntable High performance turntable with carbon ARO unipivot tonearm
