 Non ionic tenside (hydroxypropylguar)
 Preservatives (diazolidinyl urea)
 Fragrances
 Aqua
 Glycerin
 Colorants
 Methyl Parabene
 Propyl Parabene

Weight

160g

Dry-cleaning at your hands - High-Tech for your classics on Vinyl!

The High-tech compound for the most gentle and efficient cleaning of your precious vinyl records collection and sensitive phono equipment. Dry-cleaning effect! Perfectly cleans in-depth, removes dust and debris from record grooves and pick-up head. Dust and harmful particles are encapsulated by the compound, thus significantly reducing abrasion effect and minimizing sonic distortion. Dissolves grease imprints on the surface and does not leave residues!

A must have for every Vinyl-Disc-Lover!

Do not rub, just gently roll the compound over the record and carefully press it on the needle-head. Not recommended for the cleaning of acetate records! Do not use on oily or wet surfaces. Before use, wash your hands with soap and use with dry hands! Multiple use until the maximum absorption capacity is reached. Replace your Vinyl Clean when it becomes sticky, but no later than eight months after first application.
